# Farmassist Antibacterial & Multi-Disinfectant Wash

Comes in 1L & 5L

---

Farmassist Wash is a broad-spectrum solution for all animal skin types and highly effective for sanitising stables, tack, laundry, professional equipment and tools.

Fast acting, tried and proven, Farmassist is also safe and non-toxic.

Farmassist Wash leaves no visual residue or stain. Its clear solution has a refreshing fragrance and no synthetic ingredients.

## Example uses:

### Farmassist for horse/animal skin:

- Minor laceration wounds, cuts, sores, gashes, scratches.
- Skin rashes and irritated skin (eg. post clipping, insect bites etc).
- Used regularly guards against future recurrences of Mud Fever, rain scald, greasy heel etc.
- Most unexplained skin irritations, hair loss and rashes.
- Cleaning umbilical and navel sites.

### Farmassist for stable:

- Ideal solution for bridle/breastplate/bit dipping to stop cross contamination with no stain or corrosion.
- Washing machine: towels, girth sleeves, saddle blankets or anything that is used for animals requiring disinfecting.
- Disinfecting stables and all other animal housing.
- Sterilising all professional equipment and tools that require disinfecting.
- Cleaning and sterilising grooming tools and brushes.
- Ideal for cleaning water troughs, making water stay cleaner for longer.
- Disinfecting horse transporters/floats trucks etc.

## Using Farmassist Wash:

**Wounds, mud fever, rain scalds (fungi and bacteria);  
umbilical/surgical site cleaning, irritated skin, ringworm:**

- 60ml into 2L water.

Spray or wash down skin/affected area with diluted solution, do not wash or rinse away solution. Leave on the skin to let it work its magic.

Repeat as required. For more detail on mud fevers and rains scalds. Visit [www.farmassist.co.nz](http://www.farmassist.co.nz)

**For bridle/bit dipping, sterilising tools/grooming brushes etc:**

- 60ml into 4L bucket of water.

Farmassist Wash contains a natural emollient that does not require rinsing.

For a frothy solution add Farmassist Wash prior to water.

For a non-frothy solution add Farmassist Wash after water.

**Disinfecting stables and other animal housing:**

- 60ml into 4L bucket of water.

Once manure is removed and hosed out, using prepared Farmassist Wash, brush solution onto required area with a broom, covering floors, walls, stable doors/latches.

Leave on - no need to rinse. For stubborn odours pour undiluted onto area affected.

**Washing Machine:**

- Use 60ml in a full load in the final rinse dispenser.

# Farmassist Antibacterial Healing Spray

500ml

---

An easy, everyday first aid essential for quickly treating minor cuts and wounds, mud fever, rain scald, itchy manes/tails and other skin ailments.

- Effective against bacteria, fungi and most skin conditions that cause hair loss.
- Spray on all minor wounds for instant relief, soothing and healing.
- A tried and proven antiseptic product suitable for all animal skin types, in a conveniently sized spray bottle.
- A must have for horse owners in their grooming kit.
- Leaves no stain, no film for flies.

Soothe,  
Heal &  
Protect

A close-up, black and white photograph of a horse's head, focusing on the eye and the mane. The horse's eye is partially visible, looking towards the right. The mane is long and wispy, framing the eye. The background is softly blurred, showing more of the horse's coat.

One product - so many uses!

Stopping the spread of bacteria and diseases between horses is almost an impossibility in the equine dentistry industry, however since using a Chlorhexidine based product on my tools I can rest assured that this will not happen. The Farmassist Wash is brilliant, it doesn't rust any stainless steel tools and metal equipment, no ugly staining from the product, doesn't require rinsing, smells great. I definitely recommend all equine dentists, veterinarians and my equine owner clients to have some on their shelves, in their tack room and in their trucks.

Warwick Behrns  
New Zealand Equine Dentistry

Farmassist Wash and Healing Spray means I can use one product for many kinds of treatments. It gets used for everything from washing covers/saddle blankets, brushes etc including the kids on cuts and scrapes! Our pony had very itchy dry skin but a couple of washes with the animal wash and we have a much happier pony ... no more itching and has left her coat/skin soft and healthy. And our big grey boy suffers from fly bites on his legs, the healing spray soothes and heals scabs in no time.

Highly recommended, this is definitely my go to from now on.

## Farmassist gives you total peace of mind.

Farmassist is a highly effective solution against bacteria, virus and fungi, healing most equine skin ailments. Farmassist aids in the healing of mud fever and rain scald; and with regular rinsing with Farmassist Wash, guards against future recurrences.

Disinfecting everything in and around your stable. Farmassist is your complete and versatile equine care product. Fast acting, tried and proven, Farmassist is also safe and non-toxic.

We know horses and animals can sometimes be sensitive to topical solutions, our products have been formulated by chemists to instantly soothe skin, heal and minimise reactions while retaining the highest degree of strength possible.

The active ingredient chlorhexidine is non-toxic and safe for animals, humans and equipment.
